

JET CANDY

Ladies and gentleman, get ready for take-off.
This is going to be a great trip...

By Co-Director Marcella Martinelli

*Welcome to a new golden age of air travel
with the bio-regulatory, all-natural,
revolutionary answer to jet lag.*

Now there's a new way to reset your body clock
and go the distance that doesn't involve harsh
prescription medication.

Don't take the time zone hit: take Jet-Candy.

It's a familiar story regardless of what direction
you turn when boarding your flight, and how
restrained you are with the in-flight martinis.
Board in London, land at JFK, crash mid-way
through your Italian supper at Sant Ambroeus in
New York's Broadway, or a late night at Nomad.

A select clique of time-poor, travel-weary fliers
has been in the know, and using the Jet-Candy
formula with great success. From the high
demand, the business idea was developed: after
10 years of supplying this very niche audience
with the secret to happy long-haul travel without
jet lag, Jet-Candy Plane Remedy is here to stay.

MilliOnAir

How it works:

As well as allowing the internal body clock to function during long-haul, Jet-Candy helps with dehydration, fatigue, disorientation, mental sharpness and other symptoms associated with the disruption of the circadian rhythms. The remedy comes in a travel-sized dispenser with a practical pill distributor cap, perfect for carry-on, which you can tap, twist and take on the go.

What's in it:

Each bottle contains approx 100 pillules, sufficient for 8 intercontinental flights, and each one is handmade to be a 100% homeopathic remedy developed by one of the most renowned homeopaths around, containing sucrose, arnica, bellis perennis, cocculus, gelsemium and petroleum.
